Capability Statement

**Construction and
Infrastructure
Services**

www.amharc.com.au

Our Company

Amharc is a privately owned civil and mechanical engineering company that was established in 2015. Amharc originated from the convergence of a team of skilled professionals and tradesmen with the aim of delivering major infrastructure projects to the highest quality standards.

Amharc employ approximately between 10 and 50 people, depending on project requirements. Amharc has an internationally experienced team of project management professionals, with proven experience in delivering complex projects on time and on budget. The company whose headquarters are located in Brisbane with a plant, service and storage yard located in Loganholme, currently operates Australia wide.

Our Capabilities

The Amharc team have extensive experience in the construction of bridges, tunnels, rail, mine and process infrastructure and water retaining structures. We have a reputation for providing quality, cost effective and on time projects in all areas of civil works, especially bridgeworks. Amharc operate in regional and remote areas and are skilled at logistical support and in delivering engineering projects in difficult terrains and harsh climatic conditions.

Health & Safety

Amharc is committed to providing a healthy and safe working environment for all employees, contractors and members of the public.

Amharc have an impeccable safety record with safety procedures implemented in difficult terrains and harsh climatic conditions. To date, all projects have been completed with ZERO lost time injuries (LTI's). Amharc have a zero harm approach and we actively encourage our personnel to think of innovative ways to solve engineering problems and carry out works in a safer manner than the industry norm.

Resources

Amharc have a very well educated, qualified & driven team of professionals who are always striving to improve the company and move it forward. Amharc have the ability to provide in-house solutions to technical civil engineering problems. This ability combination of experienced senior professionals and tradesmen create an environment where ideas can be exchanged to arrive at the most efficient solution.

Employee and Industrial Relations

Amharc has an established Employee Relations Management Plan (ERMP) and policies that sets the objectives and approaches that have been adopted and implemented to assist with and ensure the successful management and outcomes of employee and industrial relations.

Amharc have engaged a number of external consultants to offer assistance with intricate IR issues. This has resulted in Amharc having Zero rostered work hours lost due to industrial action and Zero legal action taken against Amharc from any Union or any other party.

Our Approach

We understand that the success of any business hinges on repeat customers. To this end, our approach is to engage and collaborate with the client from as early a stage as possible to ensure outcomes are achieved safely and efficiently. We understand that our performance directly impacts on our client's ability to gain repeat customers. We aim to provide services across a range of disciplines and industries which can provide a low cost less intensive solution to mobilising multiple contractors.

Our Promise

By promoting an innovative and collaborative culture where safe behaviours are expected and rewarded and where experience is respected and drawn upon, we aim to deliver on or exceed our promises and targets and overcome all obstacles that stand in the way of achieving our outcomes and our clients objections. Core to this philosophy will be our company policies and document management system implemented to ensure that we operate within the industry standards for quality, health and safety and the environment.

Civil Engineering

- ▶ Bridge construction
- ▶ Pavements
- ▶ Retaining walls
- ▶ Pipeline and services installation
- ▶ Culvert installation and drainage works
- ▶ Precast installation
- ▶ Erosion control
- ▶ Jointing and Sealing
- ▶ Stressing and grouting
- ▶ Temporary works design and installation

Mechanical Engineering

- ▶ Structural steelwork
- ▶ Polypipe welding
- ▶ Installation of mechanical equipment incl. pumps, motors, fans, etc.
- ▶ Pipe fitting
- ▶ Cranage and rigging

Maintenance Services

- ▶ Large commercial and industrial developments
- ▶ Concrete repairs
- ▶ Plumbing services
- ▶ Landscaping
- ▶ Painting (internal and external)

Labour Hire

- ▶ General – Labourers, Trade Assistants
- ▶ Civil – Formworkers, Steelfixers, Concreters, Pipelayers, Plant Operators
- ▶ Mechanical – Boilermakers, Pipefitters,
- ▶ Services – Painters, Plumbers, Landscapers
- ▶ Cranage– Operators, Riggers, Dogmen
