

Environmental Policy

Amharc's services include the installation of formwork, reinforcement and concrete for structures including bridges, tanks and pits, retaining walls, structural footings, pile capping beams and slabs. Amharc also carry out stressing and grouting of bridge decks as well as providing polypipe welding services and labour hire services for reinforced concrete trades and general labourers.

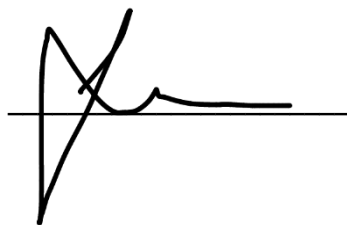

Amharc is committed to minimising our impact on the environment and working sustainably to achieve this goal.

We recognise the links between environmental sustainability, climate and human health. We aim to create a positive attitude to sustainability within our company and reduce the harm we cause to the environment as a direct or indirect result of our actions through training and education, systems and processes, innovative ideas and leadership

Amharc aim to achieve these goals by:

- Establishing, implementing and maintaining an Environmental Management System, compliant with AS/NZS ISO 14001 and certified by a third party;
- Meeting and exceeding requirements set out in legislation or codes of practice;
- Providing training to employees and raising environmental awareness within the company;
- Reducing waste produced during day to day operation of the company by reusing and recycling where possible;
- Monitoring performance and reviewing against established targets with the aim of continual improvement;
- Encouraging employees to actively participate in the identification of hazards in their workplace.

Environmental sustainability is a shared responsibility and Amharc aim to lead from the front and set a high standard for other companies to follow.
